Downloading ISMIP7 Greenland MIPkit

Data can be downloaded from the Globus ISMIP7 Observation endpoint.
For more information on how to obtain data from GHub using Globus visit Accessing Data web page. You will need to have a Globus account.

If access is denied you should contact the GHub or ISMIP6 teams. Please indicate your institutional email address; and the Globus endpoint name to which you want access in your communication. The institutional email address should be the address used for authenticating via Globus (and ideally for their GHub site registration as well).
