What are wiki pages?

Wiki Pages are meant to be user-created community editable pages covering a specific wiki or wikis. Similar to a [wiki](#), wiki pages allow users to share their knowledge of volcanology and related areas.

Who can make a wiki page?

Anyone with an account can create a new article. When creating a new article, the initial contributor can choose to have a defined list of authors, all of whom can edit the page, or have an open, wiki-like format where anyone can contribute.
