

## **Volcanology analogues wiki (NEMOH)**

<https://sites.google.com/site/volcanologyanalogues/home>

A wiki has been initiated to develop a useful and practical compilation of properties of materials used in analogue experiments of volcanic processes. It also provides a guide to scaling experiments to volcanic conditions.

This wiki was generated as part of the NEMOH Marie Curie Initial Training Network. Contributions and edits are welcome whether or not you are a member of NEMOH.

Please use COMMENTS on this vhub topic page to make suggestions to improve the wiki (that you cannot do by editing the wiki yourself).
